FILED

FEB 14 2024

Bowen Greenwood
Clerk of Supreme Court
State of Montana

TO ALL PARTIES BY THEIR ATTORNEYS OF RECORD:

PLEASE TAKE NOTICE that I, Byron L Trackwell, submits the following Notice of Errata regarding this Honorable Court not filing all my submissions that is a contradiction to “5 CFR § 1201.72 - Explanation and scope of discovery.” Discovery is the process by which all the parties to this high-profile CC case may obtain relevant information that appears reasonably calculated as a means for discovering evidence. The discovery evidence reasonably calculated with CC geophysics mathematics that has been denied by this Honorable Court are:

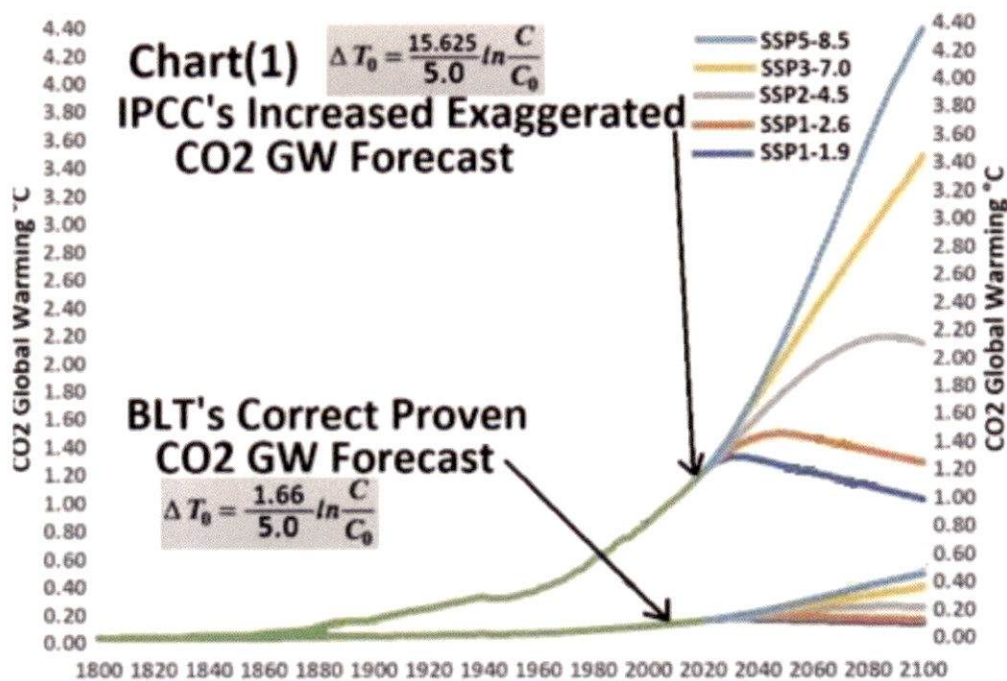

1. 2023-12-27 13:59:42.0 ORDER denying Mr. Trackwell's request for filing his Amicus Curiae Response to “The Our Children’s Trust Demand Letter to DEQ-Armb”, a letter that can be viewed on the Mont.Gov State Website. See attached (Demand Ltr Response.pdf).
2. 2024-01-09 16:42:46.0 ORDER denying Mr. Trackwell’s Motion to file his second amicus brief. See attached (BLTs 2nd Brief.pdf).
3. CC geophysics mathematics evidence by letter dated 1/21/2024 to this Honorable Court. See attached (co2GWrpTREV1.pdf).

I need the above three attached documents having CC geophysics mathematics evidence currently not in the Montana.Gov Official Website to summarize my position as a degreed seasoned Science Engineer but so what, I will use these three documents and my filings that are in the Montana.Gov Official Website as to make my summation points to this Honorable Court.

Summation points are:

1. Going back in time and putting Montana in the Stone Age by preventing Montana since 1960 from emitting 3.7 GtCO₂ emissions would only reduce GW by 0.000362°C.
2. For all of Montana's foreseeable oil/gas/coal projects when quantified and disclosed as to what the GHG emissions' harm associated with all future permits, will always be NEGLIGIBLE!
3. This determines the Plaintiff/Appellees do not have Standing as there is no CC relief specified and cannot be specified since all of Montana's foreseeable oil/gas/coal projects GHG harm will always be NEGLIGIBLE!
4. The Montana First Judicial Court August 14, 2023, appealed Ruling conflicts with the USA Supreme Court CC June 30, 2022, ruling in "West Virginia et al. v. Environmental Protection Agency et al."; the ruling by a vote of 6 to 3 stated that any time an agency does something big and new, in this case addressing climate change, the regulation is presumptively invalid.
5. As of February 2023, 194 states and the EU, representing over 98% of global greenhouse gas emissions, have ratified or acceded to the 2015 Paris Agreement, including China and the United States. The ongoing failing globalist plan is to get all the 194 states and the EU assigned to the CO₂ Emissions Cap & Trade and for this Honorable Court to have Subject Matter Jurisdiction would require this Honorable Court to have the Jurisdiction to place all the 194 states and the EU on the CO₂ Emissions Cap & Trade.
Obviously, The Montana First Judicial District Court & this Honorable Court do not have Subject Matter Jurisdiction over CC Relief.

6. IPCC has inflated GW by a factor of 9.41. That requires IPCC from 1960 to 2020 to conjure up 5,599 ZJ of energy, equivalent of exploding four million Hiroshima atomic bombs every day from 1960 to 2020 as to get IPCC's geophysics mathematics to work.
7. This IPCC's exaggerated geophysics mathematics is the cornerstone of this invalid CC CO2 emergency gripping the USA & the world.
8. The amount of additional CC energy found by NASA/NOAA from 1971 to 2018 was 358 ZJ. Using conventional extrapolation methods determines the additional CC energy since pre-industrial to 2020 by the \ln CO2 to CC energy correlation is equal to 546 ZJ. Thus, it is paramount to use the correct \ln CO2 to CC energy correlation noting that IPCC does not.
9. IPCC currently uses the "IPCC's Increased Exaggerated CO2 GW Forecast" that requires, as repeated from (6.), the conjuring up of 5,599 ZJ of energy. A violation of the laws of thermodynamics & the Stefan-Boltzmann law.

10. Yes, IPCC is a big deal authority on Climate Change with a \$14 million annual United Nations budget, 50% covered by U.S. taxpayers. What to say but to say one of the famous Albert Einstein sayings, "Unthinking respect for authority is the greatest enemy of truth". The CC truth!

RESPECTFULLY SUBMITTED by Email the 10th day of February 2024 & by
conventional means 3 to 6 days later to the Clerk of this Honorable Court.

s/Byron L Trackwell*
